Jean-Claude Corbeil is an expert in linguistic planning, with a world-wide reputation in the fields of comparative terminology and socio-linguistics. He serves as a consultant to various international organizations and governments.

Ariane Archambault, a specialist in applied linguistics, has taught foreign languages and is now a terminologist and editor of dictionaries and reference books.

Introduction to *The Firefly Five Language Visual Dictionary*

A DICTIONARY FOR ONE AND ALL

The Firefly Five Language Visual Dictionary uses pictures to define words. With thousands of illustrations and thousands of specialist and general terms, it provides a rich source of knowledge about the world around you.

Designed for the general reader and students of language, *The Firefly Five Language Visual Dictionary* responds to the needs of anyone seeking precise, correct terms for a wide range of objects. Using illustrations enables you to "see" immediately the meaning of each term.

You can use *The Firefly Five Language Visual Dictionary* in several ways:

By going from an idea to a word. If you are familiar with an object but do not know the correct name for it, you can look up the object in the dictionary and you will find the various parts correctly named.

By going from a word to an idea. If you want to check the meaning of a term, refer to the index where you will find the term and be directed to the appropriate illustration that defines the term.

For sheer pleasure. You can flip from one illustration to another or from one word to another, for the sole purpose of enjoying the illustrations and enriching your knowledge of the world around us.

STRUCTURE

The Firefly Five Language Visual Dictionary is divided into CHAPTERS, outlining subjects from astronomy to sports.

More complex subjects are divided into THEMES; for example, the Animal Kingdom chapter is divided into themes including insects and arachnids, mollusks, and crustaceans.

The TITLES name the object and, at times, the chief members of a class of objects are brought together under the same SUBTITLE.

The ILLUSTRATIONS show an object, a process or a phenomenon, and the most significant details from which they are constructed. It serves as a visual definition for each of the terms presented.

TERMINOLOGY

Each word in *The Firefly Five Language Visual Dictionary* has been carefully chosen and verified. Sometimes different words are used to name the same object, and in these cases the word most commonly used was chosen.

COLOR REFERENCE

On the spine and back of the book this identifies and accompanies each theme to facilitate quick access to the corresponding section in the book.

TITLE

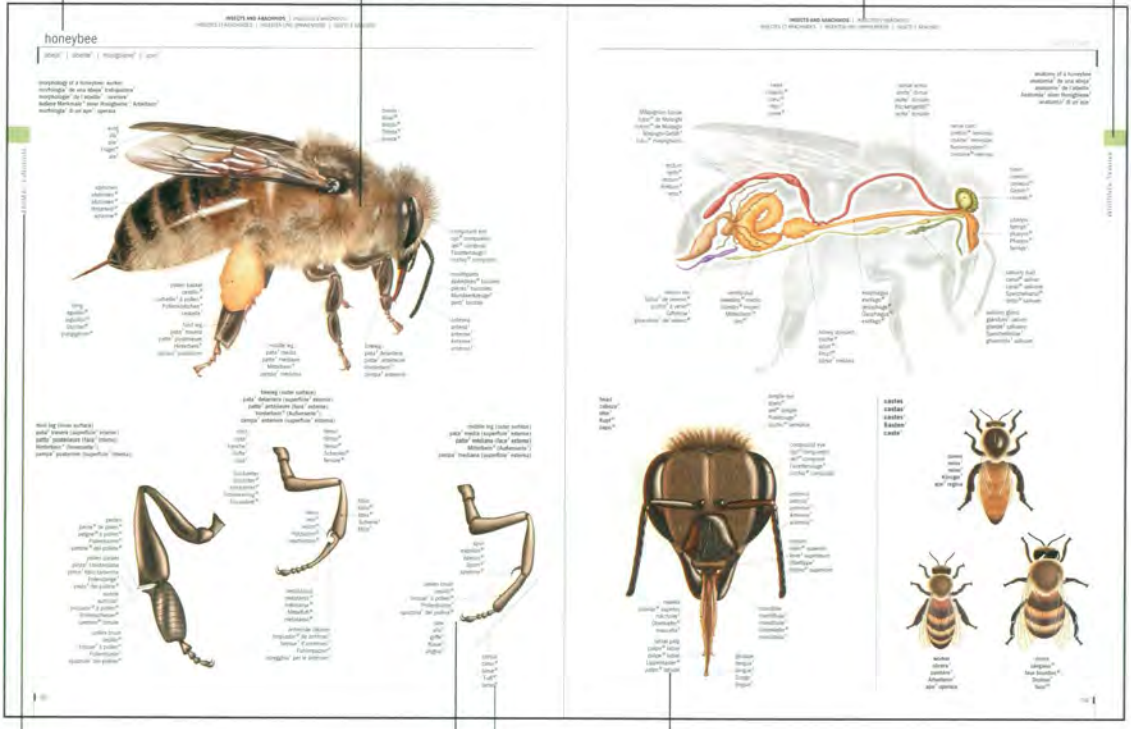
It is highlighted in English, while the other languages are placed underneath in smaller characters. If the title runs over a number of pages, it is printed in gray on the pages subsequent to the first page on which it appears.

SUB-THEME

Most themes are subdivided into sub-themes. The sub-themes are multilingual.

ILLUSTRATION

Serves as a visual definition for each of the terms associated with it.



THEME

It is always in English. The equivalent in the other languages appears on the introduction page – the first double-page spread – for each theme.

TERM

Each term appears in the index with a reference to the pages on which it appears. It is given in all languages, with English as the main index entry.

NARROW LINES

These link the word to the item indicated. Where too many lines would make reading difficult, they have been replaced by color codes with captions or, in rare cases, by numbers.

GENDER INDICATION

F: feminine M: masculine N: neuter

The gender of each word in a term is indicated.

The characters shown in the dictionary are men or women when the function illustrated can be fulfilled by either. In these cases, the gender assigned to the word depends on the illustration; in fact, the word is either masculine or feminine depending on the sex of the person.

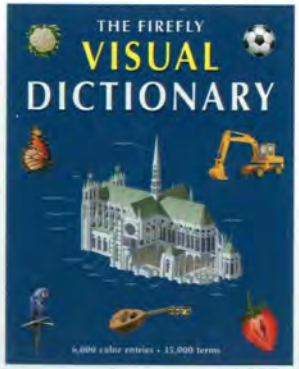
6,000 color pictures illustrate the meaning of 35,000 terms in English, Spanish, French, German and Italian.

The Firefly Five Language Visual Dictionary is an unparalleled reference to the world around us. More than 6,000 color illustrations clearly show what other dictionaries can only attempt to describe. From the parts of a honeybee to the parts of a bulldozer, the scope and depth of this fascinating reference work is immense.

Organized into a series of fully indexed sections, the detailed illustrations are clearly labeled in English, Spanish, French, German and Italian, making precise identification quick and accurate.

Using *The Firefly Five Language Visual Dictionary*, finding and translating the names of thousands of terms is fun, accurate, easy and fast.



Praise for
THE FIREFLY VISUAL DICTIONARY

"This wonderful resource will help the terminology-challenged. The concept of pictures defining words is more fully realized here than in other dictionaries of its type. The clarity, schematic detail, and contrast of the computer-generated art are stunning, superior even to photographs."
